

*To recreate the unique look of Cap'n Jack Sparrow, you need to rim your eyes with black, add a moustache and beard!*

Costume Factory can supply you with a Jack Sparrow kit that includes black crepe hair woven into plaits, a little goatee and moustache. This is how to apply crepe hair using **Spirit Gum**.

1. Place a small amount of spirit gum under your nose, wait for it to go tacky (about 30 seconds) then press the moustache into place. Lift the corners to apply the spirit gum under the outer edges of the moustache – again, wait for the gum to become tacky before pressing the edges in place.

3. To fix the goatee (small triangular piece of crepe hair) under the centre of your bottom lip – apply a small amount of gum, wait 30 seconds before pressing into place.

4. Apply a small amount of gum in a line underneath your chin along the jawbone. The two plaits should be positioned here under the chin, in line with your mouth and the moustache.

5. For a complete look – consider gold theatrical tooth enamel, also for sale at Costume Factory. Brush it on to dry teeth and allow to set before closing your mouth.

6. Remove hair applied with spirit gum with care. For multiple applications we recommend Kryolan Spirit Gum Remover, but for occasional use a medi-wipe or baby oil may also be used.
